SCE provides the following comments on the California Independent System Operator (CAISO) PRR1217¹.

SCE appreciates the CAISO providing information regarding scenarios where the offset value greater than notional value in Attachment J.5. SCE requests that the CAISO monitor this issue and report, periodically, on the impacts, including the financial values, underlying causes and trends. Such information will provide some basis regarding whether this is a problem, and if so, whether further action is warranted and what are possible solutions.
